## EDUCATION

### Bachelors of Science in Computer Science

Air University, Islamabad

07/2019 - Present

## PERSONAL PROJECTS

### Clothing Try-on web app (06/2022 - 04/2023)

- Contributed to the development of an e-commerce mobile application for western style clothing brands in Pakistan, incorporating a 2D image-based virtual try-on feature. Developed a robust web application that seamlessly integrates models and utilizes RESTful APIs for efficient communication between the frontend and backend components.

### Omni food Web app (02/2022 - 05/2022)

- The project is a responsive web application that functions as a mockup online food ordering system. It was developed using HTML5 and CSS3, demonstrating proficiency in frontend development and the ability to create visually appealing and user-friendly web interfaces.

## CERTIFICATES

### PSEB MernStack (05/2022 - 08/2022)

Government internship of mernstack

### Speed programming in UoL (01/2023 - 03/2023)
